

	<b>ISSUE</b>	<b>MITIGATION</b>
1.	<b>Arrival - Volunteers</b>	
	Volunteer(s) arrive on site with infection	Volunteers to be reminded not to come to Camp if they are ill or showing symptoms.
		Volunteers have a tent on their own unless they choose to share with family or friendship group
		Ensure adequate ventilation in the hut
2.	<b>Arrival - Children</b>	
	Children bring the infection on site	Before Camp parents to be reminded not to send their child if they are ill or showing symptoms.
4.	<b>During Camp - General</b>	
	Close contact between volunteers and children	Regular hand washing and hand sanitising particularly before meals and the start of an activity.
	Infection not identified	Activities outside as much as possible
		Clean and sanitise equipment regularly
		Two sittings for meals to avoid overcrowding
		Hand gel in all areas and children asked to hand sanitise before using equipment
		Disposable and recyclable cups for children's drinks outside the hut to avoid reuse of cups
		Ensure adequate ventilation in the hut
6.	<b>During Camp – Toilets and Cleaning</b>	
	Close contact in the toilets	Full clean of toilets each lunch time
	Infection is passed through shared equipment	Toilet for disabled to be use by boys and girls to increase availability of toilets
		Disposable cups and dispensers to prevent children sharing cups. Cleaning of outside sink and cup dispensers
		Regular cleaning of outside sink and cup dispensers
7.	<b>During Camp - Visitors</b>	

	Infection brought into Camp	All visitors will be met at the entrance arch and asked to sanitise hands
		A log of visitors and contact details will be kept.
9.	<b>Departure and after Camp</b>	
	Virus is left in tents and on touchable areas	Fogging of roll mats
		Fogging of inner tents
	Children and volunteers show symptoms of the virus after camp	List of volunteers and children is maintained to allow contact tracing
10.	<b>Infection at Camp</b>	
	Key volunteers are infected and have to isolate	Volunteers are rigorous in hand sanitising, avoiding close contact and will wear masks when needed
	Children have to go home	Review contact with others and decide on a case-by-case basis who should also isolate and go home – use lateral flow tests and temp checks to support the decisions
	Insufficient volunteers to run camp	If widespread then the camp will have to close for deep cleaning and isolation
		Contact Public Health when appropriate for further advice
